

As an Indiana citizen, I want speak out against proceeding 02-278. I am extremely satisfied with Indiana's Do Not Call List and know that the effectiveness of this law will be diminished with preemption from teh federal law. Other citizens of Indiana, as well as myself do not want our law preempted. It is clear that the challenge to the law is an attempt to find a loophole to allow those of of us who have voluntarily registered to a list that prevents contact in our private homes on our phone service is an attempt to circumvent our desire for privacy from sales calls.
